

# All About Leopards

## What Is a Leopard?

Leopards are big, wild cats with spots on their fur. They hunt other animals and eat meat.

Leopards are a lot like house cats but much bigger. They have very sharp claws and teeth.

## Leopard Facts

- A leopard's spots are called rosettes because they are the shape of roses.
- Leopards are great at climbing.
- Leopards sometimes eat plants.
- Leopards live in hot and cold places.
- A group of leopards is called a leap.
- Leopards like to swim and eat crabs.
- A baby leopard is called a cub.

A large, detailed illustration of a leopard with orange fur and black rosette spots, walking towards the left. It is partially obscured by the text box on the right.

Leopards catch their food on their own. They pull it up into a tree so other animals don't steal it.
