

LO: I can form my digits, starting and ending in the correct place.

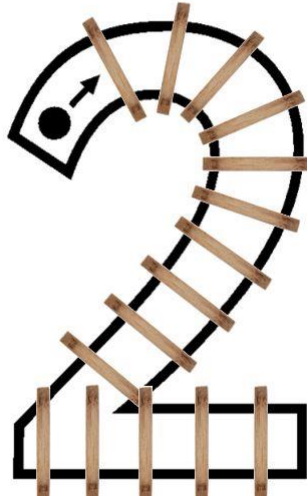

digit for none - it's left we go
all the way around to make zero

down for one
the bright star shone

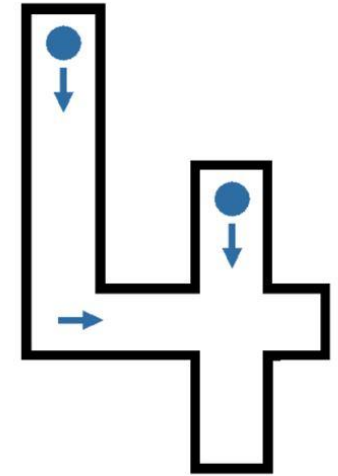

choo-choo choo-choo
right on track for number two

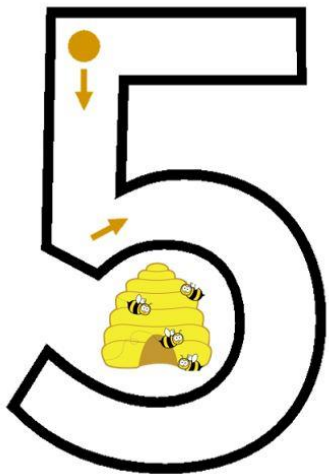

right for threes
around the trees

down and right to start a four
another line down to reach the floor

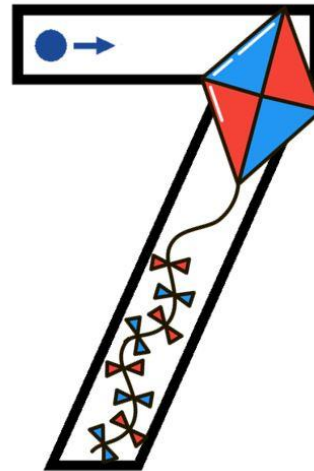

down then right around the bee hive
line on top to make a five

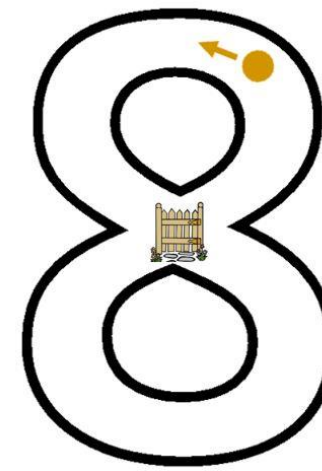

down for six then pick up sticks

seven is right
then down the kite

draw an 's' - close the gate
then you'll have a number eight

left and loop - down the vine
that will be a number nine
