

# Addition within 50 with a Number Line

Example:

$$29 + 5 = \textcircled{34}$$

A number line starting at 28 and ending at 35. The numbers 28, 29, 30, 31, 32, 33, 34, and 35 are marked. Four curved arrows are drawn above the line, each starting from a number and ending at the next number to the right: from 29 to 30, 30 to 31, 31 to 32, and 32 to 33. The final arrow starts at 33 and ends at 34, with a small arrowhead pointing to 34.

$$22 + 14 = \square$$

$$15 + 34 = \square$$

$$11 + 39 = \square$$

$$37 + 6 = \square$$
